Think of the things that are important to you. Use meth and chances are, they'll all be gone. That's because using meth just once can lead to addiction. And it's an addiction that will completely take over your life. You'll lie. You'll cheat. You'll steal. You'll become someone you're not. Do yourself a favor and stay away from it.

Knowing the signs of meth abuse might help you save someone's life.

Certain behavioral and physical changes are common among meth users. Signs of meth abuse include:

- Hyperactivity
- Drastic weight loss
- Dilated pupils
- Talkativeness
- Increased distractibility
- Tooth decay and loss of teeth
- Aggression
- Irritability
- Agitation
- Grandiose behavior
- Twitchiness
- Loss of interest in normal activities, such as food, water, sex, and sleep
- Getting "sketched out," or becoming agitated, nervous, moody, irritable, paranoid, and/or aggressive.
- Jumpy eyes
- Scratching, itching, or picking at skin
- Financial difficulties
- Not meeting financial obligations
- Absenteeism or tardiness at school or work
- Noticeable changes in behavior
- Cravings
- Social and interpersonal problems
- Impulsive behaviors
- Memory loss
- Bizarre and erratic behavior
- Repetitive behavior patterns that can last for hours, also called "tweaking" or "geeking."
- Sleep deprivation, resulting in hallucinations, delusions, extreme paranoia, or violence
