

## Membership Release

July 24, 2024 - Flandreau Santee Sioux Tribe

On Monday, July 22, 2024, President Reider and Vice President Weddell flew to New York to tour our cannabis operations; one located on the Mohawk reserve and one in Buffalo, New York.

The Mohawk venture has been experiencing challenges similar to our own past growing issues with mold and humidity; however Native Nations New York is at a pivotal point in their operations that potentially will begin producing revenue for our nation within the next six months. In addition, President Reider would like to share his vision for the St. Maarten project during these cannabis discussions.

President Reider would like to present an update to the Oyate at the following gatherings:

Town Hall Meeting	Wednesday, July 31, 2024 at 6 pm.
Community Gathering	Thursday, August 1, 2024 at 6 p.m.
General Council Meeting	Saturday, August 3, 2024

Native Nations New York has provided us with their business and financial plan to share at this meeting, along with an update on our financial investment since its inception.

We look forward to presenting these updates to you, the membership.
